SMART Campus Management Solution is an administrative Suite that provides students, alumni, faculty, staff and management with immediate access to real-time information and connects that information to specific action.

It is an adaptable solution servicing all sizes and types of institutions including small, private universities, community colleges, research institutions, and large, public, multi-campus establishments.

ABOUT SMART LATTICE

SmartLattice is an Online Database Application Platform architected to help you design, deliver and use Software-as-a-Service (SaaS) database applications, using only a web browser.

This robust SaaS platform reduces the time and costs of delivering secure, database-driven applications, while providing extensive security, data analysis and visualization, and process automation.

The multi-tenant application platform can also be installed in a data centre or private cloud computing service with custom branding or run as a platform-as-a-service PaaS from SmartLattice.

Campus Management Solution
