## ABOUT SMART LATTICE

SmartLattice is an Online Database Application Platform architected to help you design, deliver and use Software-as-a-Service (SaaS) database applications, using only a web browser.

This robust SaaS platform reduces the time and costs of delivering secure, database-driven applications, while providing extensive security, data analysis and visualization, and process automation.

The multi-tenant application platform can also be installed in a data centre or private cloud computing service with custom branding or run as a platform-as-a-service PaaS from SmartLattice.
